Internet Applications Assignment
Topic: CSS - How to Change Colors, Fonts and Website Design

Name: Safa Reda
University ID: 2501898
Section: 89
Group: C

1. Introduction to CSS
CSS stands for Cascading Style Sheets. It is a language used to style and design web pages. While HTML creates structure, CSS makes it beautiful.

2. What Can We Change with CSS?
- Colors (text color, background color)
- Fonts (type, size, weight)
- Layout (position, spacing)
- Size and borders

3. How to Change Colors and Fonts - With Examples
Example 1:
```
p {
  color: blue;
  background-color: lightyellow;
}
```

Example 2:
```
body {
  font-family: Arial;
  font-size: 16px;
  font-weight: bold;
}
```

Example 3:
```
.button {
  background-color: #4CAF50;
  color: white;
  padding: 15px;
  border-radius: 10px;
}
```

4. Ways to Add CSS
1. Inline CSS
2. Internal CSS
3. External CSS (Best method)

5. Advantages
- Saves time
- Easy maintenance
- Better design for mobile
- Faster loading

6. Conclusion
CSS transforms boring HTML into colorful, modern websites. It is essential for web development.
